The Jump Rope Readers are a series of engaging and diverse decodable books that captivate beginning readers.

Each fiction book introduces new phonics features and high-frequency words to help students build skills. After kids have read several fiction books, they can read a matching set of nonfiction books that give them opportunities to practice the same words and letter-sound correspondences while learning about new content in a new genre.

Together, all of the Jump Rope Readers provide supportive practice that allows students to gradually improve their skills as they step up towards the ultimate goal of reading confidently and fluently.

Fiction

Nonfiction

The Jump Rope Readers follow a scope and sequence that aligns to most phonics programs and can be used to supplement a range of reading programs. **Learn more**.

Jump Rope Readers: Fiction books offer beginning readers a staircase that helps them build skills.

Jump Rope Readers: Nonfiction books offer a sequence of landings for them to pause and practice those skills.
